ABSTRACT

Metaverse is a virtual world concept that continues to evolve and integrate with the real world through virtual technology. PT Bank Negara Indonesia (Persero) Tbk. has a product called BNITopia which is a company website that provides access to the virtual world that develops and is integrated with the real world through virtual technology. One of the important components that will be provided on the BNITopia metaverse website is Create Avatar. The Create Avatar module consists of steps to create a user avatar. Create Avatar itself is a digital avatar that users can use for digital visual representation in the metaverse. It is necessary to design the front end of the BNItopia metaverse website in the create avatar module as an intermediary between the user and the system so that the expected output results are in accordance with the input provided.

Keywords: Metaverse, BNITopia, *Create Avatar*
