

LIST OF TABLES

2.1	Type of Substrate Materials.	7
3.1	The Specification for initial antenna design.	15
3.2	Targeted parameters of this thesis.	15
3.3	The results of 6 GHz patches from calculations using the specifications from Table 3.1.	16
3.4	The results of 6 GHz Feed Line from calculations using the specifications from Table 3.1.	17
3.5	The results of 2.4 GHz patches from calculations using the specifications from Table 3.1.	18
3.6	The results of 2.4 GHz Feed Line from calculations using the specifications from Table 3.1.	19
3.7	The Specification for Main Feed Line.	20
3.8	The Specification for Ground Plane and Substrate.	20
3.9	The Specification for Antenna Initial Design.	22
3.10	The Change in Specification for Antenna Iteration 1.	24
3.11	The Changes in Specification for Antenna Iteration 2.	25
3.12	The Changes in Specification for the Final Antenna Iteration.	26
4.1	The VSWR Analysis.	28
4.2	Farfield Directivity properties of 2.4 GHz Azimuth radiation pattern .	32
4.3	Farfield Directivity properties of 2.4 GHz Elevation radiation pattern	33
4.4	Farfield Directivity properties of 6 GHz Azimuth radiation pattern .	34
4.5	Farfield Directivity properties of 6 GHz Elevation radiation pattern .	35
