

ABSTRACT

The Bandung Chika Cemerlang Souvenir Sales Web-Based Application is an application that encompasses the purchasing and sales management activities at Chika Cemerlang Store. This application is based on a case study at Chika Cemerlang Store in Bandung. This web-based application is built using the PHP programming language implemented using the Codeigniter framework and MySQL as its data storage medium. With the development of this application, it is expected that students can observe the progress of the project application as a reference for students in creating application projects.

Keywords: Application, Final Project, Codeigniter, PHP
