

## ABSTRACT

---

*Payroll and recording of financial reports in an auto repair shop are important things to do so that the car repair business can run well. The following is an abstract about payroll and recording financial statements in an auto repair shop: Payroll in an auto repair shop involves paying salaries to employees who work in an auto repair shop. Employee salaries must be calculated carefully and paid on time so that employees feel valued and motivated to work well. Recording of financial statements in an auto repair shop involves recording all financial transactions that occur in an auto repair shop. This includes receiving money from customers, paying employee salaries, purchasing spare parts, and so on. Accurate and regular financial reports will help auto repair shop owners make the right business decisions. Strategic management is also important to do in a car repair shop. This includes strategic planning, decision making, and business control. By carrying out good strategic management, car repair shop owners can ensure that their business runs well and generates adequate profits. In carrying out payroll and recording financial reports at the auto repair shop, the auto repair shop owner must ensure that all processes are carried out properly and in an orderly manner. This will help the auto repair business to grow and develop properly.*
