

TABLE OF CONTENTS

APPROVAL PAGE.....	ii
ORIGINALITY STATEMENT	iii
ABSTRACT	iv
GRATITUDE NOTE.....	v
TABLE OF CONTENTS	viii
LIST OF FIGURES	x
LIST OF TABLES	xi
CHAPTER 1.....	1
1.1 Background	1
1.2 Problem Formulation	2
1.3 Objectives	2
1.4 Scope of Works	2
1.5 Methods of Research	3
1.6 Summary	3
CHAPTER 2.....	5
2.1 Raspberry Pi	5
2.1.1 Raspberry Pi 3B+	6
2.1.2 Raspberry Pi OS	6
2.1.3 Django Framework	7
2.2 Switch	7
2.3 Load Balancing	7
2.3.1 Round Robin	8
2.3.2 Least Connection	9
2.4 Nginx	9
2.4.1 Web Server	9
2.4.2 Load Balancer	10
2.5 Wireshark	10
2.6 Apache Jmeter	10
2.7 Quality of Service	11
CHAPTER 3.....	14
3.1 System Topology	14
3.2 System Infrastructure	14
3.2.1 Raspberry Pi 3B+	14

3.2.2 Client.....	15
3.2.3 Support infrastructure	15
3.3 System Design	16
3.3.1 Prepare research needs	17
3.3.2 Installation and configuration tools	17
3.3.3 Implement load balancing Algorithm.....	26
3.4 Test Scenario	28
3.4.1 Load balancing test using Round Robin Algorithm.....	28
3.4.2 Load balancing test using Least Connection Algorithm.....	31
3.5 Test Analysis	32
3.5.1 Testing load balancing parameter	32
3.5.2 Testing load balancer device.....	32
CHAPTER 4.....	34
4.1 Load balancing test result.....	34
4.1.1 Throughput (rps).....	34
4.1.2 Delay (ms).....	35
4.1.3 Response time (ms)	35
4.2 Load balancer performance result.....	36
4.2.1 CPU Usage (%)	36
4.2.2 RAM usage (%)	36
4.3 Error result	37
4.3.1 CPU Usage (%) on webserver 1	38
4.3.2 RAM Usage (%) on webserver 1	38
4.3.3 CPU Usage (%) on webserver 2	39
4.3.4 RAM Usage (%) on webserver 2	39
CHAPTER 5.....	40
5.1 Conclusion	40
5.2 Suggestion.....	40
BIBLIOGRAPHY	41
ATTACHMENT.....	42
