# ABSTRACT

.

*Rek Headquarters is one of the MSMEs located in Bekasi which was established with the aim of introducing a unique type of coffee to Bekasi residents and its surroundings. Rek Headquarters Located at Jl, Boulvelard no 98 Bekasi, West Java. In the current process, sellers are still doing manual bookkeeping using Microsoft Excel. With technology currently developing very rapidly, the Founders of MSMEs and One of them are Headquarters Accounts, need a Web-Based Application to make it easier to receive orders, and also to report sales every day. This Headquarters Account Web-Based Application was built using the PHP Framework CI 4 programming language and Mysql as a database to overcome problems that occur in ordering and also recording sales. The method used in the design of this application is the System Development Life Cycle (SDLC) method with the waterfall model used.*
