

ABSTRACT

At this time the development of cafes in Bandung continues to increase, because of this the case study in this research is the design of tables at the Indonesian Ice Tea cafe Bojongsoang Garden. From this case study there are several problems including the cleanliness and tidiness of tables for visitors and staff. which is due to the problem of limited space and not being large enough. And again, the table used is an ordinary table in general and takes up space and results in disturbing the activities of visitors and employee staff, therefore minimalist table design is a solution to limited space and this will be very helpful for employee staff to maintain the cleanliness of the cafe and supporting the comfort of visitors who come, by using a qualitative method approach that makes it easier for users and staff because the table set has a minimalist shape and is easy to clean, so it can be a solution to existing problems

Keywords: cafe table, cleanliness, minimalism
