

ABSTRACT

Pangkalpinang mayor's office or known as Tudung Saji Building is the Central Goverment of Pangkalpinang. Etymologi, Pangkalpinang are consist of Pangkal and Pinang that actually Bangka Malay's phrase. Pangkal means center or distric. This is because Pangkalpinang is tin trading center and has turned into a trading center where the ships dock for a trade and became the center of all activities. While Pinang means betel nuts is a type of palm fruit that used to be sold. Pangkalpinang City is a downtown proven by Pangkalpinang's Economic Growth which experienced a significant increase in 2021 amounting to 9.27 percent (ANTARA, 2022).. This makes Pangkalpinang as the capital of Bangka Belitung have a mission to strengthen local wisdom which is the strength of Bangka Belitung's identity so that it does not lose ancestral values. according to the results of a survey conducted through data collection, observation, interviews, and literature studies, the Pangkalpinang Mayor's Office does not meet standards in terms of facilities, infrastructure, and does not meet locality values in spatial planning. Therefore, redesign is needed to implement local wisdom values to maintain ancestral values and also create suggestions and infrastructure that meet standards. The Locality Approach in this design is used to answer all the problems that exist in the design to preserve the local wisdom of Bangka Belitung and ancestral values so that they do not fade. The aim of this design is to create a mayor's office that has facilities and infrastructure, as well as making the mayor's office implement local values and become a representative office.

Keywords: *Redesign, Mayor's Office, Locality, Bangka Belitung*
