

ABSTRACT

Tawangmangu is one of the districts in Central Java Province, Indonesia. As a potential area in tourism because of its diverse natural beauty can attract the attention of the community. So in supporting the development of tourism there is a need for accommodation, one of which is the resort hotel. So that visitors from various circles will come, but there is a problem that accommodation for the upper middle class is still very minimal. Based on these problems, a new design for the interior of the Bitang 4 Resort Hotel in Tawangmangu is needed. The data collection stage method used in the new design of the 4-star Resort Hotel Tawangmangu is by conducting field studies, interviews, observations, documentation, literature studies, data analysis, programming, concept themes and final output. Through the approach of the locality and the new design made in accordance with the standards of the 4-star resort hotel can provide accommodation for the upper middle class with complete facilities that provide the character of space according to the identity of Tawangmangu locality.
