ABSTRACT

Development of the SMPN 3 Banjarharjo Website with New Student Registration Features Education as the foundation of a nation's development requires innovation in the delivery of information and administrative processes. In this context, this project aims to develop a website for SMPN 3 Banjarharjo with a focus on new student registration features. This project is expected to increase information accessibility and simplify the new student registration process, ensuring that every prospective student has the same opportunity to access quality education. With this step, it is hoped that this project can become a technological foundation that advances educational services at SMPN 3 Banjarharjo and becomes an inspiration for similar developments in other educational institutions.
