

REDESIGN OF BOGOR DISTRICT FIRE OFFICE AND HEADQUARTERS

ABSTRACT

Redesign The Bogor Regency Fire Department is a government agency that is responsible for carrying out fire rescue tasks and non-fire emergencies in the Bogor Regency sector. Apart from handling problems regarding fire and non-fire emergencies, it is a center for education, DAMKAR administration and fire investigations. The building of the Bogor Regency Fire Department has 2 general functions, namely as a headquarters and an administrative office within the building. Apart from these two general functions, the District Fire Department. Bogor also provides space for education regarding fire prevention and management. After the analysis that has been carried out there are several groups of related problems such as space circulation as well as space needs and facilities found in the field. This problem is related to the activities and behavior of building users at the Bogor Regency Fire Department. Therefore, in order for the District Fire Department to meet good operating standards, it is necessary to redesign the interior so that activities can run better and make the activities carried out within the District Fire Department more efficient. Bogor.
