

ABSTRACT

Financial and tax reports are mandatory accountability documents that must be presented periodically by Village-Owned Enterprises (BUMDes), in accordance with the regulations of Permendagri No. 20, 2018. These accountability reports must also adhere to applicable standards and regulations to ensure their reliability.

The WRAP Entrepreneurship activity report aims to provide an overview and understanding of the issues related to the presentation of financial and tax reports, as well as the implementation and automation of financial and tax reporting through the SIABDes TAXion information system at BUMDes Nubagja, Lengkong Village, Dayeuhkolot District, Bandung Regency. This activity is based on a qualitative method. Data collection was conducted through observation, interviews, document studies, and focused group discussions with BUMDes managers. The activity was carried out from September 2023 to July 2024.

The results of this activity indicate that BUMDes Nubagja still faces difficulties in presenting financial and tax reports according to standards, due to the lack of human resources within BUMDes who are knowledgeable in accounting and taxation. The implementation of SIABDes TAXion was warmly received by BUMDes managers and can provide financial accountability and transparency for BUMDes. However, there are still some challenges that need to be addressed, particularly in raising awareness among BUMDes managers about the importance of preparing financial and tax reports according to standards and digitalizing their management. This can be achieved through an educational approach, allowing BUMDes managers to appreciate the long-term benefits of using SIABDes TAXion.
