

ACKNOWLEDGEMENT

Alhamdulillah rabbil 'alamin, in completing this thesis the writer would not have been without help and support from various parties involved, both directly and indirectly. Therefore, on this occasion, the author would like to thank profusely to:

1. Allah SWT, for all His mercy and grace that has provided guidance, so that the writer can complete this research with strength and ease.
2. Both parents, Mr. Sugiyono and Mrs. Siti Rohmah always give prayers in every step of the writing and guide me with patience and love. As well as to my beloved sister and brothers who always provide support so that the writer can finish this research.
3. Mr Favian Dewanta, S.T., M.Eng., Ph.D, as a supervisor and Mrs Dr. Levy Olivia Nur, S.T., M.T., as co-supervisor, has been willing to provide time in guiding, motivating, and guiding the writer to finish the research to make sure that everything proceeds successfully.
4. My sister Qonita Rahayu Atmi who helped during the data collection process.
5. All lecturers at Telkom University have given the writer useful knowledge and the best experiences while the writer was researching, supporting the writer in completing the Final Project.
6. Mrs. Miftah Fathur Rahmi Pratama who always provides encouragement and motivation to the author.
7. Electrical Engineering 2021 friends and closest friends, who fight together, encourage and give each other invaluable knowledge and experience.

Finally, no matter how much help is given, it will not be rewarded with material, only thanks and the best prayers that the author can offer. May Allah SWT, who can repay the kindness of his servant who has helped, always be protected and make all his affairs easy. Aamiin ya rabbal'alamin.
