

ABSTRACT

The development of the financial sector, particularly the banking industry, has a significant impact on the economic growth of a country. Islamic banks, as part of the financial sector, play a crucial role in supporting economic growth and financial stability. This study aims to analyze the influence of bank health levels, assessed based on Risk Profile, GCG, Earnings (Profitability), and Capital (Capital Adequacy), on profit growth in Sharia Banks listed on the Indonesia Stock Exchange (IDX) during the period 2018-2022. Secondary data used were financial reports published by relevant Islamic banks or the Financial Services Authority (OJK) website. The results of this research are expected to provide a better understanding of the factors influencing the profit growth of Islamic banks and their implications for the stability and growth of the Islamic financial sector.

Keywords: Islamic banking, bank health, profit growth, Risk Profile, Good Corporate Governance (GCG), Earnings, Capital.
