

PREFACE

Before you lies the master thesis “Forensic Analysis Model on Fintech E-Wallet Using Digital Evidence Generalization.” It has been written to fulfill the graduation requirements of the Science Forensics program at Telkom University in Bandung.

During my previous studies, I realized I avoided stepping out of my comfort zone and just went about my daily life as usual. However, I realized that every human has the potential always to improve. In addition, I have also learned that struggling is part of the process; even though I feel scared and anxious when I think of the failure I might get, in the end, I will never know if I don’t try. Therefore, this thesis has taught me valuable lessons, both professionally and personally.

I would like to thank my supervisor, Ms. Dr. Farah Afianti, S.T., M.T., and Ms. Niken Dwi Wahyu Cahyani, S.T., M.Kom, Ph.D., for the excellent guidance and support during the process. I deliberately chose both of you as my supervisor because I knew you would provide me with challenges. This has maximized the learning opportunities, for which I am grateful. Finally, I would like to thank the teachers who were involved and gave me feedback on developing this research.

Finally, thank my family and friends for being there for me. I would also like to thank you, my reader: I hope you enjoy your reading.

Bandung,

Irfan Achmad Firmansyah
