## LIST OF TABLES

3.1	Sample of Hotels Data . . . . .	20
3.2	Sample of POIs Data . . . . .	20
3.3	Sample Data of Travel Time between POIs . . . . .	20
3.4	Sample Data of Travel Time between Hotels and POIs . . . . .	20
3.5	Sample Data of Travel Time between POIs and Hotels . . . . .	21
4.1	The Fitness Value of Each Combination of Hyperparameter Tuning . . . . .	36
4.2	Convergence Behavior Evaluation Results between Traditional ABC and HABC . . . . .	38
4.3	The Average Fitness Value of 50 sets of Random POIs for General Performance	39
4.4	Wilcoxon Rank-Sum Test for Primary Metric (Fitness Value) . . . . .	40
4.5	The Secondary Metrics of 50 Sets of Random POIs for General Performance	40
4.6	Wilcoxon Rank-Sum Test for Secondary Metrics . . . . .	41
4.7	Travel Duration (Hours) Needed to Visit All POIs in the Itinerary . . . . .	42
4.8	Days Needed to Visit All POIs in the Itinerary . . . . .	42
4.9	Average Travel Duration Needed to Visit each POI in the Itinerary . . . . .	43
4.10	Wilcoxon Rank-Sum for the Average Travel Duration . . . . .	43
4.11	Average Total Cost to Visit All POIs in the Itinerary . . . . .	44
4.12	Wilcoxon Rank-Sum Test for Fitness Value in Total Cost Analysis . . . . .	45
4.13	Average Rating of POIs in the Itinerary . . . . .	46
4.14	Wilcoxon Rank-Sum Test for Fitness Value in Rating Metric Analysis . . . . .	46
4.15	Wilcoxon Rank-Sum Test Over Various Number of POIs . . . . .	48
4.16	The Average of Daily and Overall Fitness of TSP and VRP Analogies . . . . .	50
4.17	Wilcoxon Rank-Sum Test for Overall Fitness Value between TSP and VRP Analogies . . . . .	50
4.18	Comparison of User Wait Time between HABC and ABC Algorithms . . . . .	51
A.1	The Value for each Metrics of 50 Sets of Random POIs for General Performance	63
A.2	The Value for each Metrics of 50 Sets of Random POIs for Cost Metric . . . . .	67
A.3	The Value for each Metrics of 50 Sets of Random POIs for Rating Metric . . . . .	71
A.4	Fitness Values and Running Times Over Various Numbers of POIs . . . . .	74
A.5	Daily and Overall Fitness of 50 Sets of Random POIs for TSP and VRP Analogy . . . . .	76
