## LIST OF TERMS

| Terms          | Definition   |
|----------------|--|
| RE             | Renewable Energy, Renewable energy is energy derived from natural        |
|                | sources replenished constantly, such as sunlight, wind, and rain.        |
| SDGs           | Sustainable Development Goals (SDGs) are a collection of 17 global       |
|                | soals set by The United Nations in 2015. The SDGs address global         |
|                | challenges, including poverty, inequality poverty, inequality, climate   |
|                | change, environmental degradation, peace, and justice.                   |
| PV             | Photovoltaic (PV) is a technology that converts sunlight directly        |
|                | into electricity using semiconducting materials that exhibit the         |
|                | photovoltaic effect.   |
| SPP            | Solar Power Plant (SPP) is a facility that generates electricity by      |
|                | converting sunlight into electrical energy, typically using photovoltaic |
|                | (PV) panels or concentrating solar power (CSP) systems.                  |
| CC             | Coefficient Correlation  |
| VMD            | Variational Mode Decomposition   |
| IMF            | Intrinsic Mode Functions is a component of a signal obtained through     |
|                | VMD, a method used to decompose non-linear and non-stationary            |
|                | signals.   |
| RF             | Random Forest  |
| Adaboost       | Adaptive Boosting  |
| $\mathbb{R}^2$ | R-Squared  |
| MAE            | Mean Absolute Error  |
| RSME           | Root Mean Square Error   |
