## LIST OF TABLES

3.1	Weather Data Parameters Analyzed in the Study. . . . .	16
3.2	Results of the CC analysis between electricity load and weather data. The weather parameters considered include SSRD, T2M, V10, D2M, U10, and TP, selected based on their potential impact on electricity consumption and load patterns. . . . .	17
3.3	Scenarios analyzing the effects of each weather parameter as feature input for machine learning. Scenario 1 includes only the Time Feature HH, along with holiday features HD, EH, and NY. Each subsequent scenario adds additional features from weather data, starting from the highest to the lowest.	19
3.4	Optimal hyperparameter tuning for Machine Learning models. . . . .	22
4.1	Results of electricity forecasting based on various scenarios in 3.1 using CNN models. . . . .	23
4.2	Results of electricity forecasting based on various scenarios in 3.3 using CNN with Attention Mechanism. . . . .	25
4.3	Results of Applying Empirical Mode Decomposition in Usage Scenarios for Each Intrinsic Mode Function (IMF-3, IMF-6, and IMF-7). . . . .	28
4.4	Summary of performance for three models: CNN, CNN with AM, and CNN with AM and EMD. . . . .	31
A.1	CNN results for Scenario 1, featuring HH, HD, EH, and NY. . . . .	40
A.2	CNN results for Scenario 2, featuring HH, DoW, HD, EH, and NY. . . . .	41
A.3	CNN results for Scenario 3, featuring HH, DoW, HD, EH, NY, and SSRD. . . . .	41
A.4	CNN results for Scenario 4, featuring HH, DoW, HD, EH, NY, SSRD, and T2M. . . . .	41
A.5	CNN results for Scenario 5, featuring HH, DoW, HD, EH, NY, SSRD, T2M, and V10. . . . .	42
A.6	CNN results for Scenario 6, featuring HH, DoW, HD, EH, NY, SSRD, T2M, V10, and D2M. . . . .	42
A.7	CNN results for Scenario 7, featuring HH, DoW, HD, EH, NY, SSRD, T2M, V10, D2M, and U10. . . . .	42
A.8	CNN results for Scenario 8, featuring HH, DoW, HD, EH, NY, SSRD, T2M, V10, D2M, U10, and TP. . . . .	43
A.9	CNN with Attention Mechanism results for Scenario 1, featuring HH, HD, EH, and NY. . . . .	43
A.10	CNN with Attention Mechanism results for Scenario 2, featuring HH, DoW, HD, EH, and NY . . . . .	44

---

A.11 CNN with Attention Mechanism results for Scenario 3, featuring HH, DoW, HD, EH, NY, and SSRD . . . . .	44
A.12 CNN with Attention Mechanism results for Scenario 4, featuring HH, DoW, HD, EH, NY, SSRD, and T2M. . . . .	44
A.13 CNN with Attention Mechanism results for Scenario 5, featuring HH, DoW, HD, EH, NY, SSRD, T2M, and V10. . . . .	45
A.14 CNN with Attention Mechanism results for Scenario 6, featuring HH, DoW, HD, EH, NY, SSRD, T2M, V10, and D2M. . . . .	45
A.15 CNN with Attention Mechanism results for Scenario 7, featuring HH, DoW, HD, EH, NY, SSRD, T2M, V10, D2M, and U10. . . . .	45
A.16 CNN with Attention Mechanism results for Scenario 8, featuring HH, DoW, HD, EH, NY, SSRD, T2M, V10, D2M, U10, and TP. . . . .	46
A.17 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-1. . . .	46
A.18 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-2. . . .	47
A.19 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-3. . . .	47
A.20 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-4. . . .	47
A.21 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-5. . . .	48
A.22 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-6. . . .	48
A.23 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-7. . . .	48
A.24 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-8. . . .	49
A.25 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-9. . . .	49
A.26 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-10. . . .	49
A.27 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-11. . . .	50
A.28 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-12. . . .	50
A.29 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-3,6. . . .	50
A.30 CNN with Attention Mechanism and EMD for Scenario 7 with IMF-3,6,7. . . .	51
