| <b>LIST OF NOTATIONS</b>                                    | xiv  |
| <b>1 INTRODUCTION</b>                                       | 1    |
| 1.1 Rationale . . . . .                                     | 1    |
| 1.2 Statement of the Problem . . . . .                      | 3    |
| 1.3 Objective and Hypotheses . . . . .                      | 3    |
| 1.3.1 Objective . . . . .                                   | 3    |
| 1.3.2 Hypotheses . . . . .                                  | 4    |
| 1.4 Assumption . . . . .                                    | 4    |
| 1.5 Scope and Delimitation . . . . .                        | 5    |
| 1.6 Significance of the Study . . . . .                     | 5    |
| <b>2 REVIEW OF LITERATURE AND STUDIES</b>                   | 6    |
| 2.1 Electricity load forecasting . . . . .                  | 6    |
| 2.2 Bidirectional Long Short-Term Memory (BiLSTM) . . . . . | 7    |
| 2.3 Signal Decomposition using EEMD . . . . .               | 8    |
| 2.4 Spatial correlation . . . . .                           | 9    |
| 2.5 Principal Component Analysis (PCA) . . . . .            | 11   |
| 2.6 Correlation Coefficient (CC) . . . . .                  | 12   |

|   |           |
|---|-----------|
| <b>3 RESEARCH METHODOLOGY</b>   | <b>14</b> |
| 3.1 Electricity Load Data . . . . .                                     | 16        |
| 3.2 Weather Data . . . . .  | 16        |
| 3.3 Spatial Correlation . . . . .                                       | 18        |
| 3.4 Feature Selection . . . . .   | 18        |
| 3.4.1 Time Features . . . . .   | 18        |
| 3.4.2 Weather Features Using CC . . . . .                               | 19        |
| 3.5 Feature Extraction . . . . .  | 20        |
| 3.5.1 Signal Decomposition: EEMD . . . . .                              | 20        |
| 3.5.2 Weather Features: PCA . . . . .                                   | 22        |
| 3.6 Data Splitting . . . . .  | 23        |
| 3.7 Machine Learning Model . . . . .                                    | 23        |
| 3.8 Hyperparameter Tuning . . . . .                                     | 24        |
| 3.9 Evaluation of the electricity forecasting . . . . .                 | 24        |
| <b>4 RESULT AND DISCUSSION</b>  | <b>26</b> |
| 4.1 Performance Evaluation Based on Weather Feature Selection . . . . . | 26        |
| 4.2 IMF Selection and Performance Analysis . . . . .                    | 27        |
| 4.3 Comparative Analysis of Forecasting Models . . . . .                | 27        |
| 4.4 Discussion . . . . .  | 28        |
| <b>5 CONCLUSION</b>   | <b>32</b> |
| <b>BIBLIOGRAPHY</b>   | <b>33</b> |
| <b>Appendices</b>   | <b>37</b> |
