

ACKNOWLEDGMENTS

I would like to express sincere gratitude to my supervisors Dr. Warih Maharani, S.T., M.T. and Dr. Ade Romadhony, S.T., M.T. for their guidance and insight throughout the research. Their expertise and lectures guide the direction of this thesis.

I am grateful to my colleagues and friends who are always open to discussion and giving me advice and assistance to do data labeling for this thesis and also the other academic subjects.

I would like to acknowledge countless scholars, thesis, and practitioners whose work led to this thesis. Their contribution to the field of Natural Language Processing is necessary in the context, literature, and methodology of this thesis.

To everyone who has contributed to this thesis in one way or another, your support and encouragement have been deeply appreciated. Thank you for being part of this journey.

Lastly, special thanks to my family who always gave me support and encouragement during this journey that made me accomplish this thesis.
