

ABSTRACT

Home-scale commercial tailors often experience challenges in organizing their work space and sewing tools, especially in terms of storing sewing tools and also storing personal items. This research aims to design an additional table that is ergonomic and has adequate storage space for sewing tools for tailors' needs. This additional table is equipped with integrated storage features for sewing tools, raw materials, drinks and snacks, so that it can improve the mood and work productivity of the workers. Seamstress. Sewing tools are an important thing in sewing, therefore storing and retrieving them must be easy to reach, so that the tailor does not have difficulty, this additional table was created which can make it easier for tailors to carry out activities in front of the sewing table, this sewing table is also designed with ergonomics so that it is easy for tailors to use it, with the 3 bias drawer feature it also allows tailors to store many necessities such as thread and buttons which must always be available

Keywords: *Additional table, sewing, sewing equipment storage.*
