

List of Tables

1	The results of hyperparameter tuning experiments using the UNet3+ model trained on a dataset without image processing.
2	The results of hyperparameter tuning experiments using the UNet3+ model trained on a dataset with image processing.
3	The results of hyperparameter tuning experiments using the U-Net model trained on a dataset without image processing.
4	The results of hyperparameter tuning experiments using the U-Net model trained on a dataset with image processing.
5	The test data results for models trained on dataset without image processing. The bold numbers represent the best values.
6	The test data results for models trained on dataset with image processing. The bold numbers represent the best values.
7	The test data results for integration of two model outputs. The bold numbers represent the best values.
