

LIST OF TABLES

3.1	The distribution of cut data in each session.	39
3.2	Distribution of respondent data on ERP and NO ERP classes	40
4.1	Results without channel selection on PR02.	45
4.2	Results without channel selection on PR04.	45
4.3	Results without channel selection on PR06.	45
4.4	Results without channel selection on PR07.	46
4.5	Results without channel selection on PR09.	46
4.6	Channel selection using metaheuristic baseline on PR02.	47
4.7	Classification result performance on PR02.	47
4.8	Channel selection using metaheuristic baseline on PR04.	48
4.9	Classification result performance on PR04.	48
4.10	Channel selection using metaheuristic baseline on PR06.	49
4.11	Classification result performance on PR06.	49
4.12	Channel selection using metaheuristic baseline on PR07.	50
4.13	Classification result performance on PR07.	50
4.14	Channel selection using metaheuristic baseline on PR09.	51
4.15	Classification result performance on PR09.	51
4.16	Channel selection using metaheuristic hybrid on PR02.	53
4.17	T-Test results for each channel on PR02.	53
4.18	Classification performance using metaheuristic hybrid on PR02. . .	54
4.19	Channel selection using metaheuristic hybrid on PR04.	54
4.20	T-Test results for each channel on PR04.	55
4.21	Classification performance using metaheuristic hybrid on PR04. . .	55
4.22	Channel selection using metaheuristic hybrid on PR06.	56
4.23	T-test results for each channel on PR06.	56
4.24	Classification performance using metaheuristic hybrid on PR06. . .	57
4.25	Channel selection using metaheuristic hybrid on PR07.	57
4.26	T-Test result for each channel on PR07.	58
4.27	Classification performance using metaheuristic hybrid on PR07. . .	58
4.28	Channel selection using metaheuristic hybrid on PR09.	59
4.29	T-Test result for each channel on PR09.	60
4.30	Classification performance using metaheuristic hybrid on PR09. . .	60

4.31	Distribution of the number of channels selected by baseline meta-heuristics	62
4.32	Distribution of the number of channels selected by hybrid meta-heuristics	63
