

LIST OF FIGURES

0.1	Funded by the DRTPM 2024 program	xv
0.2	Published by ICOIACT 2024	xv
0.3	Certificate for the presenter of ICOIACT 2024	xv
0.4	Submitted to Bulletin of Electrical Engineering and Informatics	xv
2.1	SoH Estimation Methods: Complex and Rapid Approaches	7
2.2	Diagram of the rapid method	8
2.3	Flowchart of RF method	11
2.4	Flowchart of KNN method	13
2.5	Flowchart of DT method	14
2.6	Flowchart of NN method	15
2.7	Flowchart of GB method	16
3.1	The flowchart of estimating the SoH of a battery pack	22
3.2	Block diagram of estimating the SoH of a battery pack	24
3.3	A wiring diagram of the automatic switching to help arrange the charge/discharge process automatically	25
3.4	A wiring diagram of the data tapping process	26
3.5	A wiring diagram of the data tapping process	27
3.6	A wiring diagram of the data tapping process	27
3.7	A code to initialize the models with the system's flowchart	28
3.8	A code to train, predict, and evaluate the model	29
3.9	A code to show results	30
3.10	The wiring diagram of SoH system monitoring	31
3.11	The sketch of the user interface of the public charging station monitoring system	32
4.1	Time vs voltage and SoH graph for charging condition	34
4.2	Time vs voltage and SoH graph for discharging condition	35
4.3	Time vs Voltage and SoC graph for charging condition	36
4.4	Time vs Voltage and SoC graph for discharging condition	36
4.5	Time vs Voltage and Current graph for charging condition	37
4.6	Time vs Voltage and Current graph for discharging condition	37

4.7	The graph of SoH vs Cycle Count that is being used in finding the gradient	39
4.8	The graph of SoH vs Cycle Count that is being used in finding the gradient	39
4.9	The LCD is showing the SoH in percentage	40
