

LIST OF FIGURE

Figure 2.1.1 Conceptual Mapping of Assurance Frameworks for ML Safety	10
Figure 2.2.2 Generic Argument Structure	11
Figure 2.2.3 Principal Element of GSN	12
Figure 2.2.4 Visual representation of a Claim, ArgumentReasoning, ArtifactReference, AssertedInference, AssertedContext, and AssertedEvidence relationstip [13]	15
Figure 2.2.5 Different Types of Claim in SACM [13]	15
Figure 2.2.6 Different Types of Asserted Relationship in SACM.....	15
Figure 2.6.1 Hierarchical Mapping of Safety Assurance Components in ML-based System Assurance.....	23
Figure 3.2.1 Research Flow	27
Figure 3.3.1 Assurance-to-Deployment Flow of ML-Based Safety Case.....	31
Figure 3.4.1 Overview of the AMLAS Process	32
Figure 3.5.1 Schematic Flow Planning	41
Figure 4.1.1 Dataset Details for a detailed visual	48
Figure 4.1.2 Model Metrics for visualization.....	49
Figure 4.1.3 YOLOv8 Object Detection Results in Smart Factory Simulation....	50
Figure 4.1.4 YOLOv11 Object Detection Results in Smart Factory Simulation ..	51
Figure 4.2.1 Log Process Object Detection in Donkey Car S1 (First Attempt with Pi Camera).....	53
Figure 4.2.2 Smartphone-based YOLOv8 Detection using Roboflow QR Deployment	54
Figure 4.2.3 Donkey Car S1 Platform with ESP and Smartphone Camera Setup in Test Scenario	54
Figure 4.4.1 FR Safety Requirements	62
Figure 4.4.2 Stage 1: ML Safety Assurance Scoping.....	63
Figure 4.4.3 Stage 2: ML Requirements Assurance	67
Figure 4.4.4 Stage 3: Data Management Assurance	69
Figure 4.4.5 Stage 4: Model Learning Assurance	72
Figure 4.4.6 Stage 5: Model Verification Assurance.....	75
Figure 4.4.7 Stage 6: Model Deployment Assurance.....	79
Figure 4.4.8 Safety Case for ML Component	83
