

ABSTRACT

CVCraft is a CV (Curriculum Vitae) management application that will be implemented at Telkom University. This application is designed to assist students and alumni in creating, managing, and updating their CV efficiently and professionally.

The main objective of CVCraft implementation at Telkom University is to improve the career readiness of students and alumni by providing a user-friendly tool for CV development. This application is expected to ease the process of creating a CV that complies with industry standards and helps users in highlighting their skills and experience effectively.

CVCraft offers various features such as customizable CV templates, informative writing guides, and the ability to update CVs in real-time. With CVCraft, Telkom University aims to improve the competitiveness of its graduates in the job market and facilitate a better transition from academia to the professional world.
