Figure I- 1. Global AI in education market.....	1
Figure I- 2. Current fri student independent competition dashboard	2
Figure II- 1. Waterfall model phases and process flow	19
Figure III- 1. Problem solving framework	30
Figure III- 2. Systematization of problem solving	32
Figure IV- 1. Existing dashboard competition.....	48
Figure IV- 2. Use case diagram.....	51
Figure IV- 3. Architecture of data sources from DITMAWA	54
Figure IV- 4. Data cleanning pipeline.....	55
Figure IV- 5. Integrated system architecture.....	58
Figure IV- 6. Low fidelity wireframe main page	61
Figure IV- 7. Low fidelity wireframe lookout studio dashboard	62
Figure IV- 8. Low fidelity wireframe chatbot page	63
Figure IV- 9. User flow diagram.....	64
Figure IV- 10. Design system component.....	66
Figure IV- 11. High-fidelity dashboard display for mandiri competition.....	67
Figure IV- 12. User registration & role assignment.....	69
Figure IV- 13. Authentication & role-based redirect	70
Figure IV- 14. User dashboard access.....	71
Figure IV- 15. Admin dashboard access	72
Figure IV- 16. Competition type selection.....	73
Figure IV- 17. User registration & role assignment.....	74
Figure IV- 18. User registration & role assignment.....	75
Figure IV- 19. Admin dashboard access	76
Figure IV- 20. Sequence diagram user dashboard	78
Figure IV- 21. Sequence diagram admin view dashboard	79
Figure IV- 22. Sequence diagram admin add competition	80
Figure IV- 23. Sequence diagram admin manage competition.....	82

Figure IV- 24. Sequence diagram admin interaction chatbot	83
Figure IV- 25. Star schema competition data.....	85
Figure IV- 26. Architecture of data migration to aiven cloud.....	86
Figure IV- 27. Design dashboard looker studio	88
Figure IV- 28. Flowise chatbot interface	91
Figure IV- 29. Prompt template SQL.....	93
Figure IV- 30. Flowchart of AI chatbot workflow.....	94
Figure IV- 31. Example conversation with AI chatbot.....	97
Figure IV- 32. Student performance distribution.....	100
Figure IV- 33. Root structure	102
Figure IV- 34. Controllers and models	103
Figure IV- 35. Blade views	103
Figure IV- 36. Database connection configuration (.env).....	104
Figure IV- 37. Routing file (web.php)	105
Figure IV- 38. Example controller file.....	105
Figure IV- 39. Blade template view	106
Figure IV- 40. Authentication flow diagram.....	107
Figure IV- 41. Frontend layout structure	109
Figure IV- 42. Frontend layout structure	110
Figure IV- 43. Embed looker studio di halaman laravel.....	111
Figure IV- 44. Integration of the flowise AI chatbot in the corner of the dashboard page.	112
Figure IV- 45. Responsive dashboard on ipad pro.....	113
Figure V- 1. Welcome page	117
Figure V- 2. Login page	118
Figure V- 3. Register page	118
Figure V- 4. Choice page admin	119
Figure V- 5. Admin dashboard main page	119
Figure V- 6. Dashboard admin with AI chatbot.....	120

Figure V- 7. View all competition data page	120
Figure V- 8. Add competition data page	121
Figure V- 9. Edit competition page	121
Figure V- 10. update delete feature	122
Figure V- 11. User dashboard page	122
Figure V- 12. Chatbot interface with clustering based insights	122
Figure V- 13. Automated authentication test result using laravel dusk	136
Figure V- 14. Automated admin dashboard test result using laravel dusk	136
Figure V- 15. Automated user dashboard test result using laravel dusk	137
Figure V- 16. Automated kompetisi CRUD test result using laravel dusk	138
Figure V- 17. Automated integration test result using laravel dusk	138
