

NEW DESIGN OF GREEN FOREST RESORT IN DAGO WITH A WELLNESS APPROACH

ABSTRACT

Abstract : Resort accommodation can be an attractive vacation option for tourists, families, and even workers, as it offers a relaxing stay with a variety of recreational facilities and other supporting amenities. Resort hotels are generally located near beaches, harbors, waterways, and mountains. With views of the Sunda Mountains, city views, natural beauty, cool air, and good tourism potential, the Dago area can be a strategic location for tourism development. The data collection method in this study used qualitative methods. Data collection was carried out through field observations, interviews, comparative studies, literature reviews, and analysis, which can serve as references in the concept and design process. The purpose of this research is to design a new resort hotel in the Dago area that is in accordance with the vision and mission of Green Forest Resort & Wedding, and can design relaxation and fitness facilities, and optimize the potential of the surrounding green nature as well as wellness tourism facilities as a solution to the high level of stress in urban communities. Through a wellness tourism approach, this research emphasizes the experience of staying with a combination of modern concepts and blending with simple and beautiful nature in accordance with the concept of Green Forest Resort & Wedding, as well as the application of relaxation facilities so that it can provide benefits for mental and physical health. In addition to aesthetics, this design also prioritizes the comfort and safety of visitors in terms of ergonomics, layout, use of materials, as well as the completeness of facilities and services for visitors.
