

PERANCANGAN BARU INTERIOR PRAMBANAN CULTURAL TOURISM RESORT DENGAN PENDEKATAN LOKALITAS

ABSTRACT

Abstract: *The Prambanan Cultural Tourism Resort is designed as a four-star mountain resort serving both as tourist accommodation and as a medium for local cultural preservation and education. Located in Kalurahan Sambirejo, Sleman, the design adopts a locality-based approach to represent the cultural values of Prambanan and the local wisdom of Sleman. Key challenges include the limited application of cultural elements, lack of local material diversity, and the influence of globalization on cultural identity. Guided by the theme "Timeless Culture" and the concept "Krawang Prambanan", the design integrates local materials, traditional patterns, and visual elements distinctive to Prambanan. The program includes a lobby, restaurant, guest rooms, villas, and a workshop, aiming to create a sustainable tourism destination that offers culturally rich and educational spatial experiences.*

Keywords: *Resort, Locality Approach, Cultural Preservation, Local Materials, Sleman.*
