

## LIST OF FIGURES

2.1	Deep Learning . . . . .	9
2.2	The standard architecture of CNN [1] . . . . .	12
2.3	Bi-LSTM Architecture . . . . .	14
2.4	CNN + BiLSTM General Architecture . . . . .	17
3.1	Block Diagram . . . . .	19
3.2	System Model . . . . .	21
3.3	Sample of Data . . . . .	22
3.4	System Model Architecture . . . . .	26
4.1	Average test accuracy on each data split . . . . .	39
4.2	Training and validation result on sample 3c (highest performance) .	41
4.3	Training and validation result on sample 5a (lowest performance) .	41
4.4	Confusion Metrics 3c . . . . .	42
4.5	Confusion Metrics 5a . . . . .	44
4.6	Accuracy results using augmentation data . . . . .	46
4.7	Training Validation Accuracy and loss 5a with Data Augmentation .	48
4.8	Confusion metrics 5a with Data Augmentation . . . . .	49
4.9	Training Validation Accuracy and loss 3c with Data Augmentation .	50
4.10	Confusion metrics 3c with Data Augmentation . . . . .	51
