

PREFACE

The author extends sincere gratitude to Almighty God for all His blessings and grace, which facilitated the completion of this Undergraduate Thesis titled "LEO SATELLITE ORBIT DESIGN APPLICATION". This Undergraduate Thesis is submitted as one of the requirements for obtaining a Bachelor of Engineering degree in the Undergraduate Study Program of Telecommunication Engineering at Telkom University, Bandung.

The author acknowledges that, in the process of preparing this Undergraduate Thesis, certain shortcomings remain, both in terms of content and presentation. This is primarily attributed to the limitations of the author's knowledge and experience. Therefore, the author genuinely welcomes constructive criticism and suggestions for future improvements.

Finally, the author apologizes for any errors or oversights encountered during the preparation of this Undergraduate Thesis, whether intentional or unintentional. May this work provide benefits to the author, readers, and all parties involved in the fields of education and information technology.
