

PREFACE

Om Awighnam Astu Namoh Siddham, all praise and gratitude the author offers to Ida Sang Hyang Widhi Wasa, God Almighty, because with His grace, mercy, and guidance, the author can complete the final project entitled "Implementation of a Deep Learning Approach and Satellite Data for Classification of Land Use and Land Cover (LULC) in Bali." This final project is compiled as one of the requirements for completing studies in the Information Systems Undergraduate Study Program, Faculty of Industrial Engineering, Telkom University. The author realizes that this final project will not be completed properly without guidance, support, and assistance from various parties who have contributed directly or indirectly.

The author would like to express his sincere gratitude to the supervisors, Mr. Nur Ichsan Utama, S.T., M.T., Ph.D., and Mrs. Dita Pramesti, S.Si., M.Si., for all the direction, motivation, and knowledge that have been given during the process of compiling this final project. The author would also like to thank his final project partners, Kevin Ariel Wibowo and Zhafran Virmanda Ilham, for their cooperation, enthusiasm, and support during the completion of this project. The author would also like to thank all parties who have helped in the process of compiling this final project, both directly and indirectly.

The author realizes that this final project still has shortcomings and is far from perfect. Therefore, constructive criticism and suggestions are highly expected of the author for improvements in the future. Hopefully this final project can provide benefits to readers and become a small contribution to the development of science. Finally, may all the kindness and assistance that has been given be rewarded accordingly by God Almighty.
