

LIST OF FIGURES

Figure 2. 1 The process of water electrolysis produces oxygen gas and acidic water on the anode side, and hydrogen gas and alkaline water on the cathode side [23]	9
Figure 2. 2 Graph of SCM Polycrystalline VS SCM Amorphous [29]	14
Figure 2. 3 Characteristics of PV Module current-voltage (I–V) and power-voltage (P–V)	15
Figure 2. 4 Water Electrolyzer Using SCM [24].....	17
Figure 3. 1 System model of production alkaline and acid water by Electrolysis Method Using Solar Cell Modules	21
Figure 3. 2 Flowchart System Production of Acidic and Alkaline Water Through Water Ionization by Electrolysis Method Using SCM Source.....	24
Figure 3. 3 Preparation Scenario Flow	25
Figure 3. 4 Data Collection Scenario Flow	25
Figure 3. 5 Analysis Scenario Flow	26
Figure 3. 6 PH Meter by Mediatech	27
Figure 3. 7 TDS Meter by Mediatech.....	27
Figure 3. 8 Soil Measurement using "3 Way Soil Meter".....	28
Figure 4. 1 Overall View of The System Testing Scheme.....	30
Figure 4. 2 System Measurement Result (With Load (PWI)) of With and Without Electrolyte Solutions: (a)Voltage; (b) Current; (c) Power	31
Figure 4. 3 Water Measurement result (a) pH; (b) TDS (ppm).....	34
Figure 4. 4 Soil Measurement result (a) pH ; (b) Moisture(%)	35
Figure 4. 5 Water Spinach Measurement Result: (a) Plant Height; (b) Leaf Length; (c) Sum of Leaf...	37
Figure 4. 6 Photo of the tallest water spinach plant (KCL P3) vs. the shortest (Raw water P2).....	37
Figure 4. 7 Red Spinach Measurement Result: (a) Plant Height; (b) Leaf Length; (c) Sum of Leaf	38
Figure 4. 8 Photo of the tallest water spinach plant (KCl P2) vs. the shortest (KIO3 P3)	38
Figure 4. 9 Green Spinach Measurement Result: (a) Plant Height; (b) Leaf Length; (c) Sum of Leaf...	39
Figure 4. 10 Photo of the tallest Green Spinach plant (KIO3 P3) vs. the shortest (KCl P3).....	40
