

PREFACE

All praise and gratitude for the grace and blessings of Allah SWT, so that the author successfully completed the Final Project entitled " **MICRO-DOPPLER SIMULATOR BASED ON MONOCULAR CAMERA AND GENERATIVE ADVERSARIAL NETWORK**" This final project is one of the requirements to achieve the degree of Bachelor of Engineering in the Electrical Engineering Study Program, Faculty of Electrical Engineering, Telkom University. The author would like to thank all those who have provided support, direction, and input during the preparation of this final project. The author realizes that this final project still has many shortcomings and is far from perfect. Therefore, the author apologizes for any mistakes and highly appreciates constructive criticism and suggestions for improvement in the future. Hopefully this final project is useful and can broaden the horizons for readers and me personally.
