

ACKNOWLEDGMENTS

Praise and gratitude are devoted to Allah SWT, the Most Gracious and Merciful, for His endless blessings and guidance that enabled the author to complete this thesis entitled “Implementation Adaptive Kalman Filter (AKF) to Enhancement Accuracy Positioning in Non-Line of Sight (NLOS) Indoor Localization”

This research would not have been possible without the unwavering support, encouragement, and contributions of many individuals. The author wishes to express sincere appreciation and deepest gratitude to:

1. My beloved Family, Ms. Esih Nuriesih, Mr. Asep Sudirman and all of my Family, whose unconditional love, prayers, and life-long support have been the foundation of every achievement. Thank you for your trust, sacrifices, and the freedom you gave me to pursue my dreams none of this would be possible without you.
2. Mr. Prof. Dr. Ir. Rendy Munadi, S.T., M.T as my first supervisor, Mr. Dr. Ir Basuki Rahmat, S.T., M.T as my second supervisor, and Ms. Gita Indah Hapsari, S.T., M.T as my third supervisor. Your mentorship, knowledge, patience, and constant encouragement have greatly enriched my academic journey. I am deeply honored and grateful for your guidance, which has inspired me to grow as both a student and a future professional in the telecommunications field.
3. I would also like to thank Mrs. Dr. Ida Wahidah, S.T., M.T., the Head of the Master of Electrical Engineering Program at Telkom University, for her leadership and support
4. My closest friends during my master's program: Ijma'u Rizki, Ade Kurniawan, Yulia Vironica, Synatria Subekti, Hanin Nafi'ah, Vi Bauty Riska Utami, and Rizqi Pratama thank you for being true companions through every stage of this academic life.
5. All lecturers, academic staff, and fellow students at the School of Electrical Engineering, Telkom University, whose support whether directly or behind the scenes has helped me complete my studies smoothly.

The author sincerely prays that every person who has contributed to this journey will always be blessed with abundant happiness, success, and good health. May this thesis serve as a useful reference for researchers, students, professionals, and policy makers interested for indoor positioning to enhancement accuracy in Non-Line of Sight (NLOS) with kalman filter methods.
