LIST OF FIGURES

1.1 Conceptual Framework. 3

2.1 Block Structure. 9
2.2 Blockchain Structure. 9
2.3 Hyperledger Fabric Key Components. 12
2.4 Mango Query Strategy. 14
2.5 Composite Key Strategy. 14

3.1 Mango-Composite Architecture. 16
3.2 Supply Chain Topology. 17
3.3 Experimental Benchmarking Architecture 21

4.1 Performance comparison of different query strategies on memory usage for single user — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 24
4.2 Performance comparison of different query strategies on CPU usage for single user — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 25
4.3 Performance comparison of different query strategies on execution time for single user — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 26
4.4 Performance comparison of different query strategies on execution time for single user — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 29
4.5 Performance comparison of different query strategies on execution time for single user — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 30
4.6 Performance comparison of different query strategies on execution time for single user — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 31
4.7 Performance comparison of different query strategies on memory usage with 10,000 for 3 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 36

4.8 Performance comparison of different query strategies on memory usage with 10,000 for 5 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 37
4.9 Performance comparison of different query strategies on memory usage with 10,000 for 7 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 37
4.10 Performance comparison of different query strategies on CPU usage with 10,000 for 3 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 38
4.11 Performance comparison of different query strategies on CPU usage with 10,000 for 5 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 39
4.12 Performance comparison of different query strategies on CPU usage with 10,000 for 7 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 39
4.13 Performance comparison of different query strategies on memory usage with 10,000 for 3 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 40
4.14 Performance comparison of different query strategies on memory usage with 10,000 for 5 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 41
4.15 Performance comparison of different query strategies on memory usage with 10,000 for 7 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 41
4.16 Performance comparison of different query strategies on Processing Time with 50,000 for 3 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 47
4.17 Performance comparison of different query strategies on Processing Time with 50,000 for 5 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 47
4.18 Performance comparison of different query strategies on Processing Time with 50,000 for 7 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 47
4.19 Performance comparison of different query strategies on CPU Usage with 50,000 for 3 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 48

4.20 Performance comparison of different query strategies on CPU Usage with 50,000 for 5 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 49
4.21 Performance comparison of different query strategies on CPU Usage with 50,000 for 7 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 49
4.22 Performance comparison of different query strategies on memory usage with 50,000 for 3 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 50
4.23 Performance comparison of different query strategies on memory usage with 50,000 for 5 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 51
4.24 Performance comparison of different query strategies on memory usage with 50,000 for 7 users — Mango-Composite, Baseline, MangoUserOnly, and CompositeKeyOnly. 51
