

ACKNOWLEDGEMENT

This thesis, along with the academic journey at Telkom University, has been successfully completed thanks to the support, encouragement, and contributions of many individuals. With deep respect and gratitude, the following acknowledgments are extended:

1. God Almighty, for His abundant grace, guidance, and blessings that continuously provided strength and perseverance throughout the research process.
2. Dearest parents, whose unconditional love and unceasing prayers have been the primary source of motivation and resilience during my academic journey.
3. All family members and relatives, for their moral support and sincere prayers, which have given strength in facing various challenges during the thesis process.
4. Dr. Muhammad Ary Murti, S.T., M.T., as the principal supervisor, for his guidance, constructive feedback, and unwavering support, which have been invaluable in both academic and personal development.
5. Dr. Astri Novianty, S.T., M.T., for her willingness to share her time, knowledge, and valuable insights, which greatly contributed to the completion of this research.
6. The lecturers of the Master's Program in Electrical Engineering at Telkom University, for their academic guidance and the knowledge imparted throughout my studies.
7. Everyone else who has contributed in any form, whether through prayers, kind words, or any form of assistance. Every contribution is sincerely appreciated. May all acts of kindness be rewarded with abundant blessings from God Almighty.
