

## DAFTAR SINGKATAN

|        |                                                                                                          |
|--------|----------------------------------------------------------------------------------------------------------|
| AES    | : Advanced Encryption Standard                                                                           |
| API    | : Application Programming Interface                                                                      |
| APK    | : Android Package Kit                                                                                    |
| Bloc   | : Business Logic Component                                                                               |
| DB     | : <i>Database</i>                                                                                        |
| DFD    | : Data Flow Diagram                                                                                      |
| DNS    | : Domain Name System                                                                                     |
| ERD    | : Entity Relationship Diagram                                                                            |
| GPT    | : Generative Pre-trained Transformer                                                                     |
| HMM    | : Hidden Markov Model                                                                                    |
| HTTPS  | : Hypertext Transfer Protocol Secure                                                                     |
| IoT    | : Internet of Things                                                                                     |
| iOS    | : iPhone Operating System                                                                                |
| ISO    | : International Organization for Standardization                                                         |
| ITE    | : Informasi dan Transaksi Elektronik                                                                     |
| JSON   | : JavaScript Object Notation                                                                             |
| JWT    | : JSON Web Token                                                                                         |
| KUHP   | : Kitab Undang-Undang Hukum Pidana                                                                       |
| MITM   | : Man-in-the-Middle                                                                                      |
| OJK    | : Otoritas Jasa Keuangan                                                                                 |
| OOP    | : Object-Oriented Programming                                                                            |
| OWASP  | : Open Web Application Security Project                                                                  |
| PIN    | : Personal Identification Number                                                                         |
| QRIS   | : Quick Response Code Indonesian Standard                                                                |
| RSA    | : Rivest–Shamir–Adleman                                                                                  |
| SDK    | : Software Development Kit                                                                               |
| SEO    | : Search Engine Optimization                                                                             |
| SSG    | : Static Site Generation                                                                                 |
| SSR    | : <i>Server-Side Rendering</i>                                                                           |
| STRIDE | : Spoofing, Tampering, Repudiation, Information Disclosure, Denial of Service,<br>Elevation of Privilege |
| TLS    | : Transport Layer Security                                                                               |
| TTS    | : Text-to-Speech                                                                                         |
| UAT    | : User Acceptance Testing                                                                                |
| UI/UX  | : User Interface / User Experience                                                                       |
| UKM    | : Usaha Kecil dan Menengah                                                                               |
| VPS    | : Virtual Private <i>Server</i>                                                                          |
| VU     | : Virtual User                                                                                           |
