This thesis is compiled with the effort, help, and support from both students and lecturers. I would like to express my deepest gratitude and thanks to:

1. Allah SWT, for granting me health, strength, patience, and guidance at every step of my journey. Without His blessings, I would not have been able to reach this stage.
2. My beloved parents, Suzandra and Refrini, who have always been there for me with their endless prayers, encouragement, and unconditional support. They have stood by me in difficult times, made countless sacrifices, and given me the strength to keep going.

All the lecturers and staff at the School of Computing, who have patiently and wholeheartedly guided me from 2020 to 2025, starting from my undergraduate studies in Informatics to my fast-track master's program. Thank you for pushing through every obstacle, overcoming doubts, and maintaining the discipline to reach this milestone. I hope I will always have the courage and confidence to pursue even greater dreams in the future. Keep going, Hana!
