

LIST OF FIGURES

2.1	(a) Attraction Movement and (b) Distraction Movement of Big Males Komodo	9
2.2	(a) Possible Matings of Female with the Highest Big Male, and (b) New Offspring after Mating	10
2.3	(a) Possible Parthenogenesis of Female, and (b) New Offspring after the female doing Parthenogenesis	11
2.4	(a) Attraction Movement and (b) Distraction Movement of Big Males Komodo	12
3.1	System Flow	15
3.2	Design Process of KMAUS	20
3.3	(a) Data Representation from Training Data, (b) Komodo Generation Process, and (c) Merged Data	22
3.4	Condition of Big Male Komodo	24
3.5	w_{ij} of Big Male Komodo	24
3.6	New Position (k'_i) of Big Male Komodo	24
3.7	Two Offsprings generated by Sexual Reproduction	25
3.8	Offspring generated by Female Komodo from Parthenogenesis	26
3.9	w_{ij} of Small Male Komodo	26
3.10	New Position (k'_i) of Small Male Komodo	27
3.11	Baseline Methods	29
4.1	The Training Curves of the Best Model on 3 of 100 Datasets using RF Classifier	34
4.2	The Training Curves of the Best Model on 3 of 100 Datasets using DT Classifier	34
4.3	Number of Winner Dataset using the RF Classifier	36
4.4	Number of Winner Dataset using the DT Classifier	37
