

# ABSTRACT

---

*Cooperative canteen Telkom Polytechnic is one of Telkom University's cafeteria located at the Faculty of Applied Science. This canteen provides a place to lease, that is counter, for the vendors selling foods and beverages which became their menus. To take a lease the counter of this canteen, the tenant must make a contractual agreement with the owner who manages the cooperative canteen family of Telkom Polytechnic. From the results of that contract agreement, also contained a profit-sharing agreement for the canteen owners and tenants. This application was created to manage the counter for lease, processing user data and user role, calculate the amount of profit every month to get the profit-sharing, and to make an automatic journals. Application was created by programming languages of PHP and using MySQL database. This application presents user data, counters data, leasing data, profit-sharing data, and journals.*

*Key words: Leasing, User Role, Profit Sharing, PHP*
