

ABSTRACT

Nowadays, one of the problem that we often heard is about people often lost their important datas, its caused by the gadget is broken, the file is deleted accidentally, and many more. So cloud service is needed to back up important datas so its more secure and can be downloaded anywhere and anytime.

One of never ending debate topic in IT people is which one better between windows or Linux. Bassicly, Windows and Linux operating system have its characteristic and so do their fans. In other to we get the apraisal about them objectively, we need do the observation in the netral side.

In this thesis, has been done performance comparation analysis cloud storage in Windows and Linux. Hopefully, this thesis can give the information objectively about which one better between Windows and Linux.
