

ABSTRACT

Mobile phone and its applications is growing rapidly after this millennium era. It seems not difficult to imagine that in the future we will bring a device which has function not only for mobile communication, but also has capability playing music and video DVDs, watching TV, playing games, digital cameras, reading books, guiding maps, transaction banking, browsing, and so forth. One of application that is a trend today is the development of mobile application for Android devices. Android provides an open platform for developers to create their own applications for use by a variety of mobile devices Android.

Mobile application that is made in this Final Project is the application of TOEFL (Test of English as a Foreign Language). The demand of TOEFL score recommendation has been through in almost every educational institution, so there is some application that utilized TOEFL as a training tool that can improve user's TOEFL score. Along with technological development in the modern era which can be accessed everytime and everywhere, practice TOEFL can be made on mobile devices that more flexible. Therefore built a TOEFL application using the Android operating system.

From the results of tests performed showed that these applications can run well, all the functions and features are as expected. Then the application is very helpful for user to prepare their Toefl test.
