

ABSTRACT

Survey is most matter manual which can be conducted by human being. Survey is tiring matter. Survey nor forever have the high truth. Often happened mistake because of Human error. Survey activity is often done by Land and Building Tax (PBB) Indramayu officer. As according to name of its office, the survey often analyse the problem of earth (soil) and building. Linking this problem very important, so expected there no mistake happened. There must have new breakthrough that can lessen mistake at survey. Its solution is by exploiting information system (SI). Exploiting digital map that result of photo satellite. Its result is good correctness progressively and mistake can lessen. Result is there are a little mismatch between Nilai Jual Objek Pajak (NJOP) and the real situation, and Potency Land and Building Tax (PBB) Prediction for Tembi lor village that give result lower than Land and Building Tax (PBB) decision of central office.
