

Abstract

Department of financial revenue management and regional assets (DPPKAD) in the 50 kota District is a institution that manages the whole financial and regional assets. All activities, reports and information of finacial , and also assets in this district will be encapsulated and will be applicable if it gets permission from this departement. Districts of 50 Kota overshadows 79 *Nagari* in it. DPPKAD function is to provide and monitors income and expenditure budgets throughout the Nagari of 50 kota district.

In the development of business information should be harmonization with information. Information strategy design is the first step that will surely be passed by any businessperson who will build an information strategy. This meant that the business plan that will be executed by the Nagari can be assisted by appropriate information strategys, so that data revenue and expenditure budget Nagari is well controlled efficiently. Thus, we need a guide in the design of information strategys in order to achieve goals in line with expectations. The methodology that is used in making the guide is a *Business System Planning* (BSP).

Keywords: information strategy, Business Systems Planning (BSP), departments, finance, Nagari, efficient.
