ABSTRACT

SMS Gateway defined by a system that is used by service providers to send and receive SMS. The existence of an SMS gateway it is increasingly in demand and growing. At first SMS gateway is used to facilitate a person or a company to send an SMS with the same message to many people in the same time. But now with the system and better programming, SMS gateway not only to send messages but can be used for other purposes. As do the calculation poll, conduct banking transactions, even to keep track of someone. Therefore, the system " *Designing Real Quick Count at Local Level Election Commission (KPUD) based SMS Gateway* " is designed as a service content that can be used to obtain results closer to the truth data.

Keywords: SMS Gateway, Real Quick Count
