

ABSTRACT

Public Internet (abbreviated: cafe) is one type of internet entrepreneurs who rent out services to the public. In general, customers have come to the cafe to use the service. In the area there is a cafe dayeuhkolot Atmosphere that has a service called "Internet On The Kost" that allow customers around the location of Atmosphere figuring to be able to enjoy broadband internet access from their rooms. Customers around the cafe to access the internet using a voucher which they get to buy it directly at the cafe. For customers who are far away from the location of the cafe would be a bit difficult to get a voucher.

To facilitate customers get vouchers, created a website in which customers can order a voucher without having to come to the cafe. Any balance of the reservation will be subject to withholding. Customers can use internet banking, ATM, or sms banking for balance charging. On the server side there will be a sms gateway that processes the customer balance charging.

Final project titled "Voucher System Design for figuring via Internet Web Based SMS Gateway" is expected to be a solution to overcome these problems. Expectations of this application so that customers can more easily enjoy the services offered by the internet cafe.
