ABSTRACT

In the world there is a wide range of different tribes, cultures, and languages. To integrate human communication in many parts of the world, it's needed a language that can harmonize each person that can creat the desired communication. One way is to use the same language; therefore it's needed a language that can be understood by all people in the world. Language that can unite the communication between people in different parts of the world is English, also an international language in communication. So that, learning English in various levels of education are compulsory and important. One of it is in the college for example IT Telkom. IT Telkom is a technology institution which concerns to hard and soft skills. Therefore English is very important and must be learned by all students in IT Telkom, especially first year students. In the first year, English is a base subject which named as Bahasa Inggris 1, which refers to listening and reading material.This tool uses the Python programming language that will be applied in Ren'py. This application will help and provide a different way of learning Bahasa Inggris 1 in IT Telkom which points on reading and listening. Materials in this application will be taken from the handbook of Bahasa Inggris 1 IT Telkom and other related materials.The tool is expected to improve student interest in learning English and can help improving the ability of students in listening and reading. Hopefully, this application can help all people, not limited for IT Telkom students only.
