

ABSTRACT

PT TELKOM is a state-owned corporation that yielding goods and services for the prosperity of humanity, it also has a strategic role in assisting construction and development of surrounding environment. Therefore, Telkom Community Development Center is devoleped. TCDC is composed from 2 units programme, Kemitraan and Bina Lingkungan programme. The business processes in PKBL TCDC is still conducted manually, so it is required a software integrating data that become a reference for manager to making decision.

This final project is an application that directed to Financial Division of TELKOM Community Development Center (TCDC), wich is able to programme, organize, and control in arrangement and realisation of RKA (Rencana Kerja Anggaran) process for Program Kemitraan and Bina Lingkungan of TCDC ,so it can be approved by the head of BUMN. And also programme activities reports of PKBL, namely anually report and three month report.

This final project made use the web technology, Macromedia Dreamweaver and Adobe Photoshop for the design, as for scripting use PHP with MySQL databases. And Waterfall method for the developing phase.
