ABSTRACT

The System of attendance and salary, represent operational of Management of Human Resource (MSDM) in Al-Ihsan Bandung's Islamic Hospital. Until this time, Personalia Staffs at Al-Ihsan Bandung's Islamic Hospital working hardly to make a monthly report or annually report. It caused by the manuall presence and salary system which need a high cost and inefficient work quality.

Because of that problems, the goal of this Final Project is build the software based on web which will help Personalia Staffs at Al-Ihsan Bandung's Islamic Hospital to notes the presence and employee salary.

This software can handle work presences, event presences, shift presences, overtime work presences, employee salary and reporting the presences and employee salary at Al-Ihsan Bandung's Islamic Hospital.

This final project was implemented Study Literature and Waterfall methode. Besides, this web based software have been built using PHP (Hypertext Prepocessor) for programming script, Dreamweaver MX for designing web and MySQL for developing database.
